

ENVIRONMENTAL POLICY

Singapore Airlines Cargo is dedicated to carrying freight across the world. We take a long-term view in the sustainable development of our air transportation and related businesses. This includes the broader responsibilities to the worldwide communities that we serve, and recognition that our operations take into account the preservation of the environment.

We are committed to continual improvement in environmental performance and will take appropriate measures to address key areas of environmental concern.

We will:

- communicate this policy to all staff and provide training where applicable to ensure that every employee is capable of fulfilling his or her environmental responsibility.
- be open about our environmental affairs and will provide appropriate information as requested by interested parties.
- monitor changes in environmental legislation, audit our compliance and cooperate fully with environmental regulatory authorities.
- establish an environmental action programme to achieve the Company's objectives in the management of environmental issues relating to the use of water and energy, emission to atmosphere, effluent discharges, waste management, noise and relations with key suppliers.

Goh Choon Phong
