

# Where care meets cargo solutions

## Temperature-controlled containers

We partner with selected cold chain suppliers to protect your pharmaceuticals and sensitive cargo with our range of insulated containers such as:

### Active containers

Temperature-controlled containers with either dry ice or electrical cooling and heating systems

### Passive containers

Containers insulated with special materials that maintain the temperature of your shipment

## Dedicated cold room facilities

Sensitive cargo has very specific temperature needs. We cater to different temperature requirements with dedicated cold chain facilities, which come equipped with customisable temperature settings.

## Quality corridor network

Our certified stations across the world ensure highest quality assurance for the handling and transportation of temperature-sensitive goods at all times.

## Quick ramp transfer

Your temperature-sensitive cargo is delivered safely and swiftly between cold rooms and aircraft to minimise exposure to ambient temperatures.

## Thermal blankets and cool dollies

We minimise the impact of temperature exposure on your shipment throughout the handling process.

## Priority uplift

With pharmaceutical products, our preferential uplift service ensures your cargo is delivered on schedule.

## Tracking and visibility

Monitor the status of your shipment from origin to destination with tracking devices approved for use on board our aircraft.

# Going the distance to keep your life-saving cargo cool

# In a class of its own

Temperature and time are key to transporting pharmaceuticals. **THRU-COOL**, our state-of-the-art cold chain service, ensures elevated care for every shipment.

You can be assured of an unbroken cold chain every step of the journey. Besides an extensive range of features designed for time-sensitive and temperature-controlled pharmaceutical cargo, we provide customised solutions that cater to different shipping needs.

## Global connectivity and infrastructure

Our home base at the Singapore Air Pharma Hub provides world-class facilities, advanced handling capabilities, and an extensive network of over 100 destinations, ensuring the efficient transport of your cargo across the globe.

## Quality assurance you can trust

Besides attaining the IATA CEIV Pharma certification, we conduct frequent station audits to ensure the highest pharmaceutical handling standards are upheld.

## Dedicated cold chain services

Our facilities and services are designed to keep your pharmaceutical products cool and safeguard the integrity of your cargo. From thermal covers that minimise impact to thermal exposure, to active tracking and checking of container temperature levels, your pharmaceutical cargo undergoes dedicated handling and operational procedures.
